

Abdelaziz OUEDGHIRI

Software Engineering – Backend & Applied AI

Sole designer and developer of Transinaut, a full-stack customs classification SaaS in production. Hands-on experience in backend architecture. Seeking a software development internship.

Fez, Morocco · Open to Casablanca

Projects & Achievements

Transinaut | TypeScript, Next.js, React, Node.js, Supabase, PostgreSQL, Qdrant, Redis (Upstash)

November 2025 – Present

- Designed and deployed a full-stack SaaS from scratch: an AI assistant for customs classification (10-digit HS codes) for freight forwarders in Morocco, Canada, and Australia, with multi-company management, conversation history, and subscription billing (Polar).
- Implemented a multi-model RAG pipeline: OpenAI query reformulation, Cohere embed-v4 embeddings, Cohere rerank-v3.5 reranking, Qdrant vector search, served from a dedicated Node.js backend on a VPS, proxied through Next.js 16 / React 19 / TypeScript.
- Secured the application in production: httpOnly JWT, Redis rate limiting (Upstash), reCAPTCHA v3, strict CORS, PII masking in logs, multi-tenant architecture with per-company data isolation, via Supabase and Polar webhooks.
- Active platform: ~1,600 unique visitors, ~4,500 views between February and August 2026.

Chronicler | Electron, Next.js, React, TypeScript, FastAPI, Python, Docker, Docker Compose

March 2026 – Present

- Designed Chronicler, an AI assistant that answers questions from a company's own documents (contracts, reports) and can run 100% offline with no data sent to the cloud; co-developed with a team of 3 (final-year project), with 11 signed letters of intent secured from product demos.
- Dual-mode architecture (cloud / self-hosted): local LLM and embeddings (Ollama) for offline mode to protect client confidentiality (GDPR), single binary, Docker Compose stack with automated updates.
- RAG pipeline on PostgreSQL + pgvector: hybrid search (HNSW + GIN), swappable AI providers with no redeployment needed (Ollama, Cohere, OpenAI).
- Asynchronous FastAPI backend (188 endpoints, JWT, 18 migrations, 22 test modules); led a team of 5 from prototype to production.

Experiences

Product Engineering Intern

EcoNextGen

July – August 2026

Fez, Morocco (Remote)

- Functionally tested a WhatsApp-driven e-commerce platform with an integrated AI agent, built for Moroccan merchants: designed test scenarios, identified and documented bugs before production release.
- Audited advertising acquisition channels (Click-to-WhatsApp Ads, CPM benchmarks) and delivered a Meta Ads strategy report shaping the platform's customer acquisition approach.
- Designed and presented a three-tier monetization model to the product team ahead of commercial launch.

Web Developer Intern

AYA Intercontinental

February – April 2025

Fez, Morocco (Remote)

- Independently designed and developed a responsive showcase website in HTML5, CSS3, and JavaScript for a client company, handling the entire development cycle.
- Integrated interactive JavaScript features: animations, navigation sidebar, contact form, and map integration.
- Deployed and maintained the site in production via Git and SFTP, with regular follow-up on client-requested changes.
- Internship completed remotely during the school term, requiring independent management of priorities and deadlines.

Education

Master's in Information Systems Engineering & Artificial Intelligence (IS2IA)

Higher School of Engineering in Applied Sciences – ESISA – Fez

September 2026 – Present

Bachelor's in Software Engineering

Higher School of Engineering in Applied Sciences – ESISA – Fez

September 2023 – June 2026

SMI – Mathematics and Computer Science

Sidi Mohamed Ben Abdellah University – Fez

September 2022 – June 2023

Baccalaureate (Bac) – Physics and Chemistry

Lycée Moulay Slimane – Fez

September 2021 – June 2022

Skills

- Programming Languages:** C, C++, C#, Python, JavaScript, TypeScript, Java, SQL, HTML5, CSS, Bash, x86 Assembly
- Frameworks & Libraries:** Next.js, React, FastAPI, Node.js, Electron
- Databases & DevOps:** PostgreSQL, MySQL, MongoDB, Supabase, Qdrant, Redis (Upstash), Docker, Git, Linux/Unix, VPS Deployment
- AI & ML:** RAG Pipelines, Vector Search, Prompt Engineering, LLM Integration (OpenAI, Gemini, Ollama), Embeddings, Multi-model Orchestration
- Security:** JWT Authentication, Rate Limiting, reCAPTCHA, CORS, PII Handling
- Architecture & Concepts:** OOP, Data Structures & Algorithms, System Design, Multi-tenant Architecture, REST APIs, UML, Embedded Systems, Microservices, .NET
- Soft Skills:** Teamwork & collaboration, Autonomous work & self-management, Client communication, Project management, Production delivery, Time management, Problem solving, Adaptability

Certifications & Training

- Intermediate PostgreSQL – University of Michigan, Coursera (in progress)** September 2026
- AFWAJ Program Participant – Entrepreneurial Support, CRI (Regional Investment Center) Fès-Meknès** September 2025

Organizations & Activities

- President, ESISA Gaming Club:** Event organization and team coordination April 2026 – Present
- Member, ESISA Charity Club:** Participated in organizing fundraisers and charity actions November 2025 – Present
- Secretary, ESISA Cinema Club:** Administrative management and screening organization September 2024 – February 2025
- Staff, ESISA Junior Hackathon 2nd Edition:** Co-organization and logistics coordination for the event April 2026
- Competitor, ESISA Senior Hackathon (team):** 8th place in a competitive development hackathon June 2025

Languages

- English:** Full professional proficiency
- French:** Upper-intermediate (DELFI B2)
- Arabic:** Native language
